

# **Call to Action: Support Global Drug Policy Reform**

***World Drug Day, 26 June 2009***

## **I. The War on Drugs has become a War on People**

As the United Nations brings worldwide attention to problems related to illicit drugs, we call for a new approach.

In too many countries, the “war on drugs” has become a war on people. Millions of non-violent drug users face abuse and imprisonment, while they have no access to proper healthcare or effective treatment. Low-level traders and producers receive sentences disproportionate to their crimes and languish in prisons around the globe. Millions more face crop destruction and police harassment as they struggle to make ends meet, with few alternatives as the global economy falters. Meanwhile, the HIV epidemic gains pace.

## **II. Five Actions Today**

After decades of policies that have failed to make our societies safer or healthier, and given overwhelming evidence which shows that criminalizing drugs is both counterproductive and highly destructive, we call on governments to:

1. Focus on reducing the harms related to drug trade and use, such as making needle and syringe exchange programs widely available.
2. Decriminalize the possession of drugs for personal use.
3. Ensure that evidence-based treatments for pain and addiction are widely available, including methadone and buprenorphine.
4. Treat supporting farmers in moving away from coca or poppy cultivation as a development issue.
5. Comply fully with human rights obligations in any drug control measure, ensuring proportionality of penalties, abolishing the death penalty, and avoiding non-evidence-based forms of treatment.

## **III. Driving Away Drug Users Creates Public Health Disasters**

Nearly three decades into the global HIV epidemic, we reiterate that driving people who use drugs underground only makes the transmission of HIV and hepatitis more likely. The number of HIV infections due to injecting drug use is rising steadily. In parts of Eastern Europe and South-East Asia, this figure reaches 80%.

As the International Federation of the Red Cross and Red Crescent Societies has said, *“Forcing drug users to hide and denying them access to life-saving treatment and prevention services is creating a public health disaster. This happens even though the evidence from scientific and medical research on best practices and cost benefit analyses is overwhelmingly in favour of harm reduction programming.... The message is clear. It is time to be guided by light of science, not by the darkness of ignorance and fear.”*

Indeed, rather than a security-focused approach that costs roughly \$100 billion per year worldwide, we need to look at this first and foremost through the lens of public health. In the blind effort to rid the world of drugs, 80% of cancer patients worldwide are denied access to opiate-based pain relief.

## **IV. Adopt a Humane Approach**

A humane, compassionate approach to drug use based on harm reduction principles and respect for human rights is the most effective way to limit the negative impact of drug use, trade, and production. Scientific and medical research on best practices and cost benefit analyses overwhelmingly favors harm reduction programs, including needle exchange, drug substitution therapy, and condom distribution.

We applaud countries who have already taken steps in this direction. Recently, both Germany and Switzerland have voted to make medical heroin available for chronically dependent opiate users and the new U.S. administration has come out in support of needle exchange. Ecuador pardoned thousands of drug ‘mules’ imprisoned with disproportionate sentences and 80 Argentinean judges made a public call to reform their country’s drug laws.

In order to stop the spiral of drug-related violence and disease intensifying across the globe, more countries must follow suit.

**This Call to Action is supported by:**

**International Organizations**

President Cardoso, Co-chair, Latin American Commission on Drugs and Democracy  
Michel Kazatchkine, Executive Director, Global Fund to Fight AIDS, Tuberculosis and Malaria  
Massimo Barra, Vice-President, Standing Commission of Red Cross/Red Crescent Movement  
Kieran Daly, Executive Director, International Council of AIDS Service Organizations  
Balasz Denes, Executive Director, Hungarian Civil Liberties Union  
Gregg Gonzalves, International Treatment Preparedness Coalition  
Martin Jelsma, Drugs and Democracy program, Transnational Institute  
Craig McClure, Executive Director, International AIDS Society  
Dr. Robert Newman, International Center for Advancement of Addiction Treatment  
Professor Gerry Stimson, Executive Director, International Harm Reduction Association  
Raminta Stuikeyte, Director, Eurasian Harm Reduction Network  
Carmen Tarrades, International Community of Women Living with HIV/AIDS  
Mike Trace, Chairman, International Drug Policy Consortium  
Kasia Malinowska-Sempruch and Daniel Wolfe, Open Society Institute

**National Organizations**

Zackie Ahmat, Deputy General-Secretary, Treatment Action Campaign, South Africa  
Dr. Apinun Aramrattana, MD, PhD, Department of Family Medicine, Faculty of Medicine,  
Chiang Mai University, Thailand  
Patrizia Carrieri PhD, Researcher, French National Institute for Health and Medical Research (INSERM),  
France  
Rubem César Fernandes, Director, Viva Rio, Brazil  
Jacek Charnast, Chairman, Polish Drug Policy Network, Poland  
Professor John Nicholas Crofts, Nossal Institute for Global Health, University of Melbourne, Australia  
Aleksander Ciechanowicz, Director General, Humanitarian Action, St Petersburg Fund for Medical and  
Social Programs, Russia  
Dr. Marcus Day DSc, Director, Caribbean Drug & Alcohol Research Institute, Saint Lucia  
Clement Edwards, Director, Substance Abuse Advisory Council Secretariat of Saint Lucia  
Richard Elliott, Executive Director, Canadian HIV/AIDS Legal Network, Canada  
Professor Pat O'Hare, Director, HIT, United Kingdom  
Hakima Himmich, Director, Association de Lutte Contre le SIDA, Morocco  
Professor Dr. Adeeba Kamarulzaman, President, Malaysian AIDS Council, Malaysia  
Sandra Kanck, Australian Parliamentary Group on Drug Law Reform, Australia  
Grażyna Konieczny, Chairperson, Social AIDS Committee, Poland  
Professor Joep M.A. Lange, Center for Poverty-related Communicable Diseases, Academic Medical Center,  
University of Amsterdam, the Netherlands

Prem K Limbu, President, National Users' Network, Nepal

Joesph Meharris, Manager, d'Oasis Drop in Centre, Port of Spain, Trinidad and Tobago

Professor Daniel Mejia, Economics Department, University of the Andes, Colombia

Phumi Mtetwa, Executive Director, Lesbian and Gay Equality Project, South Africa

Ethan Nadelmann, Executive Director, Drug Policy Alliance, United States

Professor Aimé Charles Nicolas, *University Hospital of Fort de France, Martinique*

Professor Wiktor Osiatyński, Poland

Dr. Cristina Pimenta, Executive Director, Brazilian Interdisciplinary AIDS Association, Brazil

Professor Carla Rossi, Director, Centre for Biostatistics and Bioinformatics of the University of Rome Tor Vergata, Italy

Sebastian Saville, Executive Director, Release, United Kingdom

Joel Simpson, Founding Co-Chairperson, Society Against Sexual Orientation Discrimination, Guyana

Paisan Suwannawong, Director, Thai AIDS Treatment Action Group, Thailand

Professor Pierre de Vos, Department of Public Law and Jurisprudence, Law Faculty, University of Western Cape, South Africa

Professor Daniel Tarantola, School of Public Health and Community Medicine, University of New South Wales, Australia/France

Dr. Alex Wodak, President, Australian Drug Law Reform Foundation, Australia

Wan Yanhai, Director, Beijing Aizhixing Institute, China
